

DUETTE® ARCHITELLA®

Honeycomb Shades

The Panaché™ fabric comes in a variety of brilliant colors.

The Architella® Collection from Duette® honeycomb shades doubles nature's most perfect shape, the honeycomb, to create a revolutionary shade.

Style. Choose either the light-filtering semi-opaque fabrics or the room-darkening Eclipse™ fabric in one of two pleat sizes, the versatile 3/4" or the larger 1 1/4".

—Our innovative honeycomb-within-a-honeycomb construction means that colors are truer, pleats are crisper and energy efficiency is dramatically increased.

—The inner, narrower honeycomb features the TruePleat™ design so fabric pleats remain crisp on each side of the shade.

—Three distinct air pockets trap more cold air in the winter and more heat from the sun in the summer, so your home stays comfortable during any season.

At the top, Eclipse opaque fabric for room darkening. Below, semi-opaque fabric. Since less light comes through the honeycomb-within-a-honeycomb construction, colors remain rich and true.
